

CHAIRMEN

Alessandro Gasbarrini, Marco Innocenti
IRCCS Istituto Ortopedico Rizzoli - Bologna (Italy)

SCIENTIFIC BOARD

Stefano Boriani, Gisberto Evangelisti, Riccardo Ghermandi
Istituto Ortopedico Rizzoli - Bologna (Italy)

FACULTY

Stefano Boriani - University of Bologna (Italy)
Raphaele Charest-Morin - Vancouver General Hospital, Vancouver (Canada)
Nicolas Dea - Vancouver General Hospital - Vancouver (Canada)
Davide Maria Donati - IRCCS Istituto Ortopedico Rizzoli - Bologna (Italy)
Alessandro Gasbarrini - IRCCS Istituto Ortopedico Rizzoli - Bologna (Italy)
Ziya L. Gokaslan - Brown University - Providence RI (USA)
Marco Innocenti - IRCCS Istituto Ortopedico Rizzoli - Bologna (Italy)
Laurence D. Rhines - MD Anderson Center - Houston (USA)
Patrizia Tomba - IRCCS Istituto Ortopedico Rizzoli - Bologna (Italy)

VENUE

Aula Vasari
IRCCS Istituto Ortopedico Rizzoli
Via Pupilli, 1 - 40136 Bologna (Italy)

How to reach the venue: www.ior.it/en/curarsi-al-rizzoli/how-reach-us

REGISTRATION

For registration click here: www.leanevent.it/rizzolifriends24_reg/
Places available: **70**

Bologna, Italy • September 20th, 2024

IRCCS Istituto Ortopedico Rizzoli - Aula Vasari

Program

Short and informal scientific meetings are frequently more productive than larger congresses, particularly when speakers have known each other for a long time and have already shared experiences. Everyone uses the same terminology, and results are evaluated according to the same criteria.

The treatment of Spine Tumors has developed rapidly in the last 30 years, evolving from pioneering activities with limited resources to new technologies allowing early diagnosis, more accurate planning, and surgical precision.

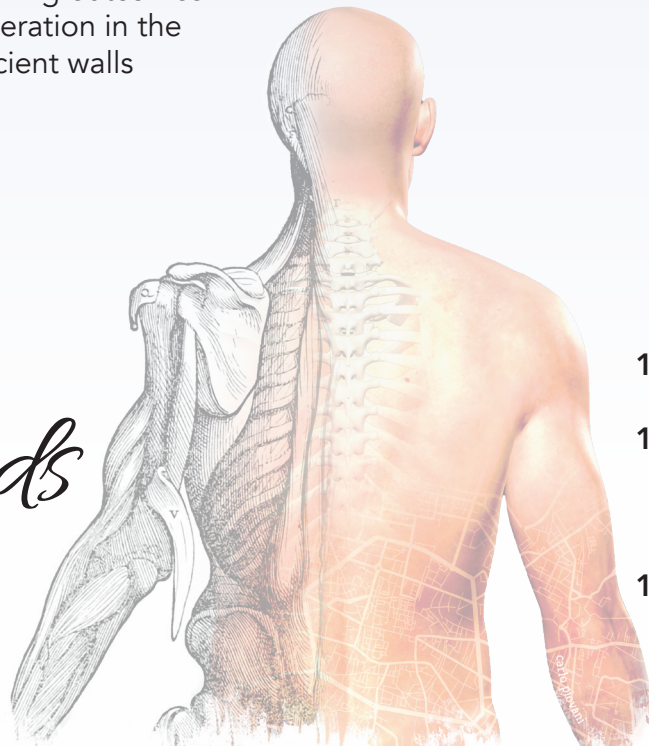

Small but close-knit groups of passionate researchers (among which is the AOSpine KF on Tumors) have popularized theoretical and practical knowledge.

A multidisciplinary approach is now considered indispensable. In this perspective, surgical techniques are conforming to radiotherapy by using new, more compatible materials, and to medical oncology through minimally invasive techniques. The role of plastic surgery is increasing as better consideration of soft tissues has proven critical in reducing complications and improving outcomes.

All these issues will receive consideration in the friendly atmosphere within the ancient walls of the Rizzoli Institute.

RIZZOLI
& friends

*...Sharing experiences
on Spine Tumors Surgery*

- 14:00** Welcome address Institutions
- 14:10** Introduction - **Alessandro Gasbarrini**
- 14:15** Where you are: one century of orthopedics...and 8 centuries of the Rizzoli Institute - **Patrizia Tomba**
- 14:40** **Keynote lecture**
50 years of Spine Tumor Surgery at Rizzoli Institute
Stefano Boriani
- 15:00** En bloc resection of Thoracic spine tumors: tips, tricks, and pitfalls - **Nicolas Dea**

3-D Models and Virtual Cutting Guides: Enhancing Accuracy of En Bloc Resection - **Lawrence Rhines**

Separation surgery : Basic concepts, implants material, tips, tricks, and pitfalls - **Raphael Charest-Morin**

Primary tumors of the cervical spine - **Zya L. Gokaslan**

The role of Plastic Surgery in the surgical treatment of spine tumors - **Marco Innocenti**

Bone tumors of sacroiliac joint - **Davide Maria Donati**
- 17:00** Open Discussion (case based if required)
- 17:30** **Keynote lecture**
Adding Safety and Precision to the techniques of EnBloc resection: the ResegOne - **Alessandro Gasbarrini**
- 18:00** Farewell cocktail
